

WORLD RALLY FLYING CHAMPIONSHIPS SOUTH AFRICA

22ndFAI WRFC 2021 | Stellenbosch Aerodrome, South Africa | 6 –20 Nov 2021

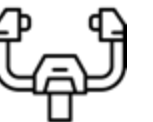

PROSPECTUS

The Sport of Rally Flying

This overall aim for Rally Flying is achieved by:

1. Emphasizing the ability to **navigate** by following a set of route instructions, using basic plotting equipment
2. Emphasizing the ability to **fly a precise track** while adhering closely to a timing test (punctuality test)
3. Emphasizing the ability to perform realistic observation tasks while navigating the aircraft on a timing test
4. Emphasizing the ability to **land the aircraft** on short and narrow landing strips

The sport of Rally Flying is aimed to improve fundamental flying skills to enable a team (Rally Crew of 2) to navigate and handle their aircraft under Visual Meteorological Conditions (VMC) as independent of technical subsystems as possible. Thus Rally Flying enhances flying safety
